time to come. Since a large number of Caechs are affected by these purges, either directly or indirectly, a firm hasis of confidence and a following of devoted disteners can be developed. Emphasis on purges will greatly damage the Communist Party within the CSR. VOA should be sure to give the background of each person purged, including the position he held. This should apply to individuals in minor positions as well as those in the more important ones. The facts leading up to the purge should be clearly stated. For example, a serious mistake in this connection would be to say of Bedrich Geminder, that he was "former party state-tary general". Information on the background, job, at must be accurate. Anything but facts would destroy the confidence of the listeners who are dependent almost entirely on foreign news sources concerning purges within their own country.

- 5. To capture and hold the interest of the younger generation in Czechoslowakia, that the following points might 50X1 well be novered by VCA:
 - (a) opportunities for American youth just out of school, such as complete freedom to study any subject or profession, and free choice of profession or vocation;
 - (b) comparative differences between wages and prices (cost of living) in the USA and the CSR. This subject has almost unlimited possibilities for expansion which have been unexploited;
 - (c) freedom of opinions and expression of ideas;
 - (d) freedom of movement and travel.

-end-
